PROFILE

- A detail-oriented computer science graduate with excellent analytical approach to task, time management and problem solving skills, seeking a challenging position where my creative initiative and genuine enthusiasm would allow me to progress. I am able to work well both on my initiative and as part of a team in a variety of settings.

- My main strengths are adaptability, excellent written and oral communication and the determination to play a proactive role in a Dynamic IT Environment and contribute well to the organization with unparalleled commitment and dedication ensuring timely delivery of projects. I try to learn something new from every experience because I believe there is always room for self-improvement, both personally and professionally.
